SUMMARY

Motivated B.Tech Computer Science student with a strong foundation in Python and Artificial Intelligence. Experienced in building machine learning projects and passionate about developing intelligent solutions to real-world problems. Continuously learning modern AI technologies and applying them to build practical, scalable applications.

EXPERIENCE

Operations & Technology Intern — *June 2026 - Present*
Zytra Tech Solutions Pvt. Ltd.
Working on an AI Governance platform supporting AI asset management, use case management, risk assessment, and compliance, while assisting with testing, validation, documentation, and AI governance practices.

SKILLS

Programming: Python, SQL
Web: HTML, CSS, Django
AI & Data Science: NumPy, Pandas, Data Visualization (Matplotlib), Machine Learning, Deep Learning, Retrieval Augmented Grammar-RAG, Large Language Models (LLMs), AI Agents, Data Preprocessing, Model Evaluation
Tools: Git, GitHub, VS Code, Jupyter Notebook
Languages: English, Telugu, Hindi, Tamil

PROJECTS

ORVEN – Enterprise AI Validation Platform — GitHub Repo
- Developed **ORVEN**, an enterprise AI validation platform with AI asset management, RAG-based document retrieval, LLM evaluation, experiment tracking, and automated model performance assessment for scalable AI governance.

ORVEN AI – Enterprise AI Assistant — GitHub Repo
- Developed a full-stack AI assistant with conversational AI, research, code review, image generation, resume analysis, and email assistance.
- Integrated **Cloudflare Workers AI** with a responsive Next.js frontend and streaming responses.

Android Malware Detection Using Static and Dynamic Analysis — GitHub Repo
- Published research on Android malware detection using ML and 1D-CNN models.
- Built and evaluated KNN, Naive Bayes, Decision Tree, Random Forest, and 1D-CNN models.

Web-Based Health Diagnosis System — GitHub Repo
- Developed an AI-based health diagnosis system using CNN and ontology techniques.
- Built the backend using Java and MySQL for data management.

Water Quality Prediction — GitHub Repo
- Developed ML models to predict water quality from environmental data.
- Applied Random Forest, Logistic Regression, and KNN for classification.

Photography Portfolio Website — GitHub Repo
- Developed a responsive photography portfolio using Django, HTML, CSS, and Python.
- Implemented dynamic image management and interactive gallery features.

EDUCATION

S.R.M. Institute of Science and Technology — 2022 – 2026
B.Tech in Computer Science and Engineering (CGPA: 8.39)
Sri Chaitanya Junior College — 2020 – 2022
Intermediate (MPC)
Sri Somanatha Greenfield Public School — 2019 – 2020
CBSE (Class X)

CERTIFICATIONS

Machine Learning Specialization – DeepLearning.AI (Coursera) — Generative AI with Large Language Models – DeepLearning.AI (Coursera) — Oracle Cloud Infrastructure (OCI) Foundations (2025)

ACADEMIC SERVICE AND LEADERSHIP

Reviewer – ICICST 2026 (NIT Jalandhar): Reviewed research papers in AI and Machine Learning.
Author & Presenter – ICICST 2026: Presented and published a research paper at the conference.
Leadership Experience: ORM Committee Head – AARUUSH — Discipline Committee Head – DSA
